# MightyMount™ Installation Guide
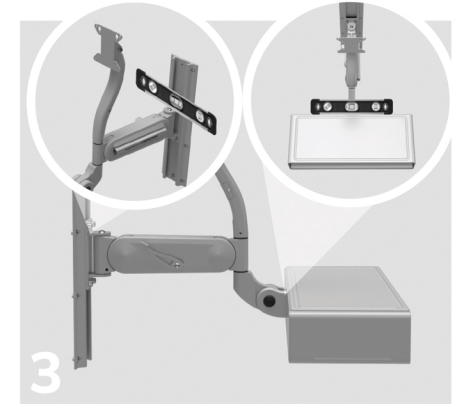

Parts included:
1/4" hex key wrench
(4) M4x8 thumb screws
(4) M4x12 thumb screws
Track cover

**1** Install mounting track. Refer to separate track installation guide for reference.
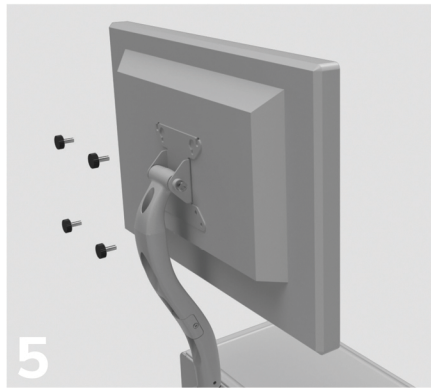

2 Insert MightyMount sliding bracket into track and loosely tighten 1/4" hex bolts at preferred mounting height.
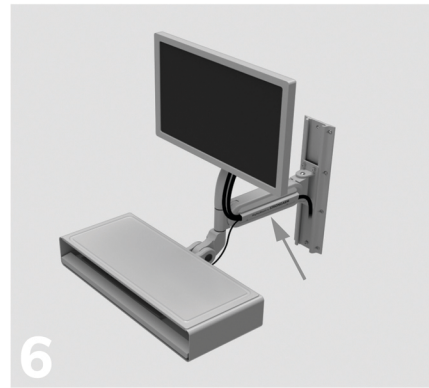

3 Using a small level, align MightyMount and use supplied hex wrench to tighten the four 1/4" hex bolts.
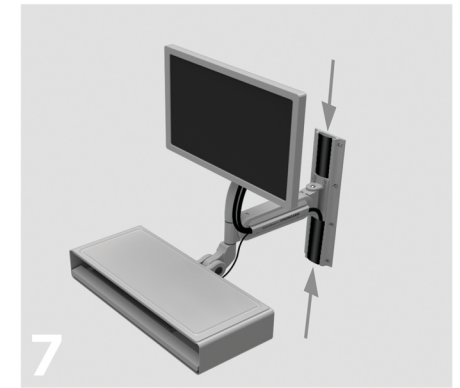

4 To access internal USB hub, twist rear latch 1/4 turn and slide keyboard enclosure top outward.

5 Use M4x8 or M4x12 thumb screws to attach display to display mounting bracket.

6 Attach display cables and thread cables through detacheable cable guard. Tie wraps may be inserted through hole in display neck for additional security.

7 Trim supplied track cover to desired length and slide into mounting track channel as shown.
