MightyMount

Quick Start Installation Guide

What's Included

A) 1/4" Hex Key

B) (4) Display Thumb Screws (M4 x 8)

C) (4) Display Thumb Screws (M4 x 12)
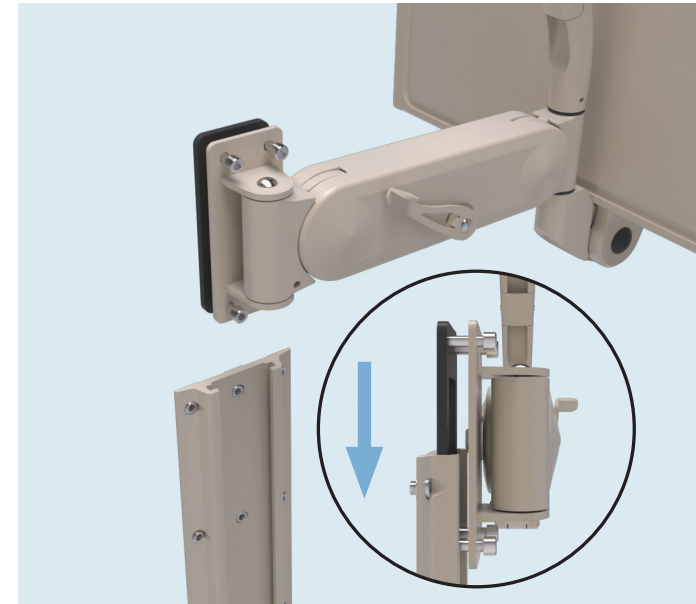

D) Track cover

Tools You'll Need

• #1 Phillips screwdriver

• Wire Cutter & Tie Wraps (for securing keyboard and mouse cabling: see Step 4 for instructions on accessing prewired USB hub)
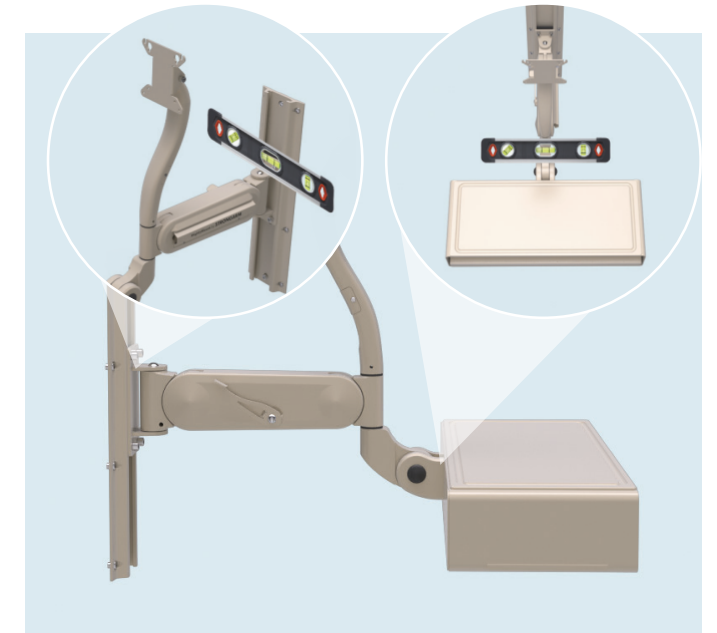

1. Install Mounting Track*

** Refer to track installation instructions*

2. Install Onto Track

3. Level and Tighten

Use 1/4" Hex Key to Tighten Four Slider Key Bolts
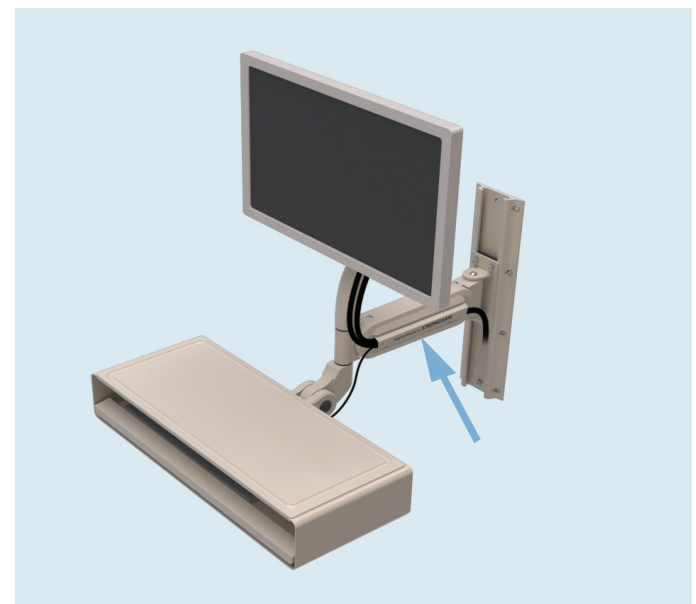

4. USB Hub Access

1) Turn latch on rear of keyboard enclosure to release cover. Pull cover forward to access the USB hub.

5. Install Display

Using (4) M4 x 8 Display Thumb Screws, attach display to MightyMount. (*NOTE: If the M4 x 8 Display Thumb Screws can't be threaded sufficiently to provide a secure attachment, use the M4 x 12 Display Thumb Screws instead.*)

6. Run Cables and Install Cable Guard

Display cables can be secured to the neck with a tie wrap fed through the provided holes
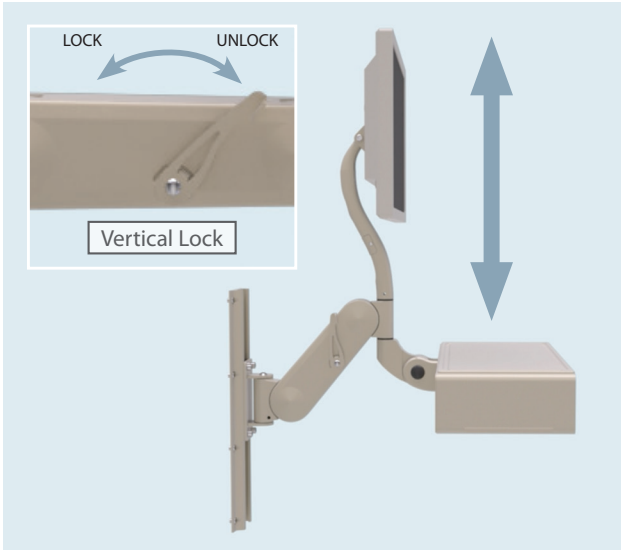

7. Install Track Cable Cover

Cut supplied track cover to desired length(s) and slide into track channels as shown
